Start with about 4 feet of thread. Thread one end on a needle and tie a sloppy knot in the other end so the beads won't slid off.

(pic 1) Put 8 purple beads on, pushing them down to within 2 inches of the end of the thread.

(pic 2) Tie a knot, forming the 8 beads into a circle. Leave the thread to tie off with later.

(pic 3) Add 1 green, pushing it down so it lays in the center of the circle. Go down through 1 purple straight across from the knot.

(pic 4) Add 2 green. Go down through 2 purple. Then go up through 2 green just added. Pull snug.

(pic 5) Add six green. Go up through 1 green from previous step to form a circle.

(pic 6) Add 1 purple, pushing it down so it lays in the center of the circle. Go down through 1 green straight across from where you came out.

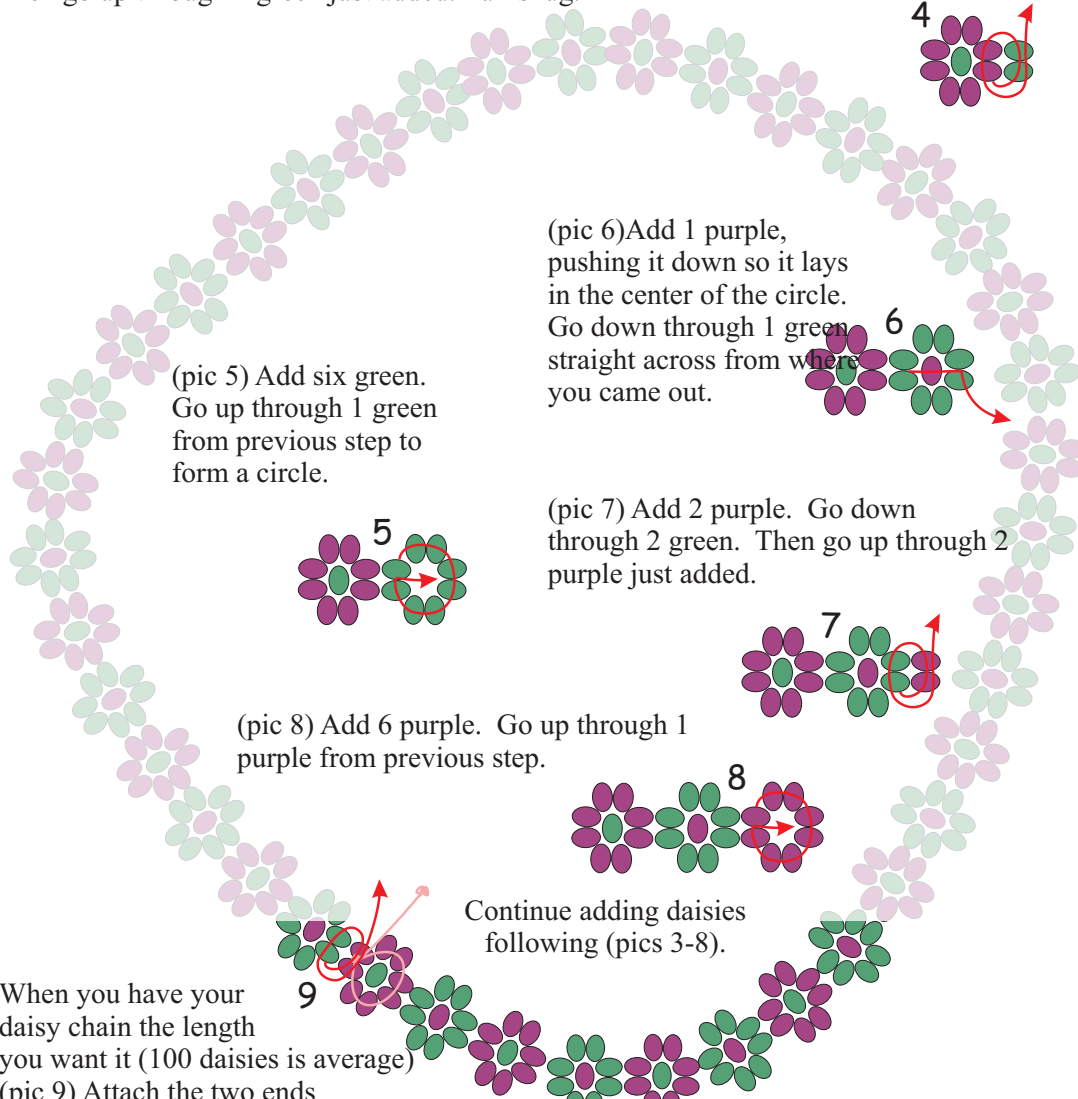

(pic 7) Add 2 purple. Go down through 2 green. Then go up through 2 purple just added.

(pic 8) Add 6 purple. Go up through 1 purple from previous step.

Continue adding daisies following (pics 3-8).

When you have your daisy chain the length you want it (100 daisies is average)

(pic 9) Attach the two ends by going up through 2 purple on the first daisy and down through two green on the last daisy. Go through those four beads again, just for good measure. Tie your 2 threads together.
